

Thanks to its natural rubber base, Racloprema, offers excellent mechanical properties at every level; tensile strength, elongation at break, tear propagation resistance, abrasion resistance, etc.

It's particularly resistant to abrasive fine-grained media such as sand, sandblasting, fine media, sanding dust, etc.

In addition, it has a high flexibility, elasticity and offers a protection against corrosion and reduce the influence of noise and vibration.

## APPLICATIONS

Conveyor belts and lining of containers, e.g. Funnels, gutters, pump housings, tanks, silos etc. to avoid wear due to very aggressive products such as:

- Boulders, wood and chemical products
- Fine-grained media
- Chemical products
- Medium to high density media
- Media with medium to high hardness
- Fine dry media with a max. temperature of +70°C

Can be used as a protective curtain during cleaning and disposal work:

- Quarries
- Gravel pits
- Cement and concrete industries

| MECHANICAL PROPERTIES             | Examination after | Value                         |
|-----------------------------------|-------------------|-------------------------------|
| Yellow Rubber                     |                   | Racloprema 430                |
| Density                           |                   | 0.95 ± 0.05 g/cm <sup>3</sup> |
| Hardness                          | ASTM D2240        | 35 ± 5 Shore A                |
| Tensile strength                  | ISO 37            | ≥ 24 MPa                      |
| Elongation                        | ISO 37            | ≥ 700%                        |
| Further tear resistance           |                   | ≥ 30 N/mm                     |
| Abrasion resistance               | ISO 4649          | ≤ 60 mm <sup>3</sup>          |
| Compression set after 22h at 70°C | ISO 815-1         | ≤ 30%                         |

## TEMPERATURE

|                       |           |
|-----------------------|-----------|
| Operating temperature | -40/+80°C |
|-----------------------|-----------|

## BEHAVIOR AFTER AGING

|                                      |           |             |
|--------------------------------------|-----------|-------------|
| Δ Hardness after 70h at 70°C         | ASTM D573 | ≤ 5 Shore A |
| Δ Tensile strength after 70h at 70°C | ASTM D573 | ≤ 15%       |
| Δ Elongation after 70h at 70°C       | ASTM D573 | ≤ 25%       |

## CHEMICAL RESISTANCE

| Diluted acids and bases | Concentrated acids and bases | Ozone      | Oils and hydrocarbons |
|-------------------------|------------------------------|------------|-----------------------|
| Good                    | Acceptable                   | Acceptable | Not recommended       |

## DIMENSIONS — Thickness in mm

|                       |                       |                    |
|-----------------------|-----------------------|--------------------|
| 2, 3, 4, 5, 6 (± 0.4) | 8, 10, 12, 15 (± 1.0) | 20, 25, 30 (± 1.4) |
|-----------------------|-----------------------|--------------------|
